DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/041,087, filed on December 28, 2001. *Information Disclosure Statement*

2. The prior art documents submitted by the applicant in the Information Disclosure Statement filed on December 23, 2003 have all been considered and made of record (note the attached copy of form PTO-1449).

Drawings

3. This application has been filed with eight (8) sheets of drawings, which have been approved by the Examiner.

Double Patenting

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claims 1 and 2 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 2, respectively of prior U.S. Patent No. 6,636,683. This is a double patenting rejection.

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

Art Unit: 2874

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 3-13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3-8 of U.S. Patent No. 6,636,683. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference in the claims is the use of the term "moving means" in claims 3 and 4 versus the term "lens moving means" in the Patent claims 3 and 4 and "said lens system" in claims 4 and 6 versus the term "said system" in the Patent claims 4 and 6. The various terms are deemed to be substantially equivalent since the lens moving means for moving a lens of the Patent claims is clearly a moving means for relatively moving a lens, and said system of the Patent claims is clearly a lens system. Claims 5-8 are otherwise the same as claims 5-8 of the Patent. Furthermore, claims 11-13 are equivalent to claims 3, 4 and 6 of the Patent. Regarding claims 9 and 10, the optical attenuation values and the wavelength dependency are not claimed in the Patent. However, the claimed values would have been obvious since it has been held that where the general condition of a claim are disclosed in the prior art, discovering the optimum or workable ranges or the discovering optimum value of a result effective variable involves only routine skill in the art.
